

IoT Gateway

Empowering Wireless

IE22 SERIES

Highly Versatile, Reliable and Rugged

Available in 3G/4G and LTE and with WAN, LAN, Wi-Fi and serial connectivity, the IE22 gateway is designed for mission-critical enterprise applications.

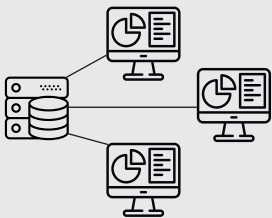

Advanced Failover

Maximise uptime by seamlessly switching between multiple Internet interfaces. (optional)

Multiple Tunnelling Schemes

Secure your data using a variety of VPN tunneling schemes, including PPTP, L2TP, OpenVPN, GRE and Ipsec with embedded firewall.

Advanced Load Balancing

Spread or bind your data traffic across the multiple Internet interfaces, based on data type, source or destination and the relative WAN connectivity costs

Sales & Payment

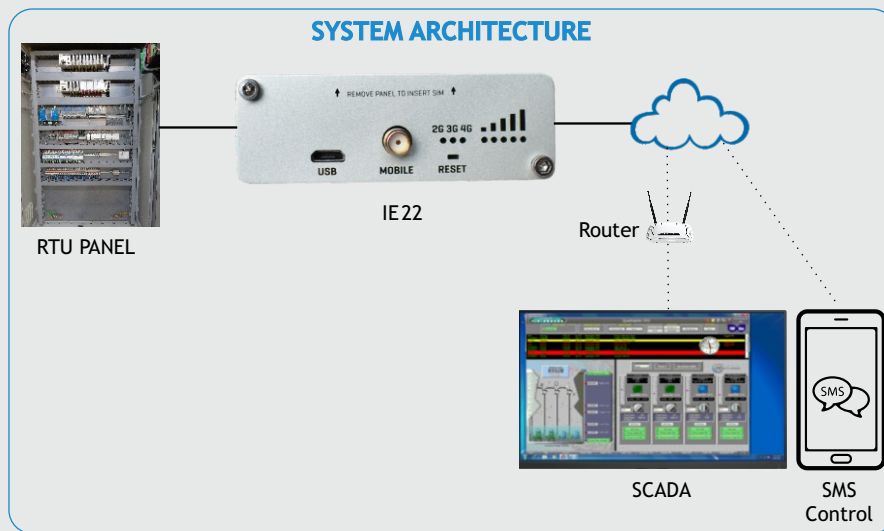

Infrastructure & Transportation

Industrial Automation

TYPICAL APPLICATION

IE-22T

SALIENT FEATURES

- SMS Control
- Compact Size
- Remote Access
- Less Power Consumption
- Encrypted Software Management

IE22T Specifications

Network	LTE/4G/3G/2G
SIM slot	Available
Antenna connector	Available
Ethernet	Upto 1000 Mbps
Input/Output	2 DI/DO
Processor Speed	1.2 GHz
RAM	128 MB
Flash	512 MB
Input voltage range	9 - 30 VDC
Power connector	4 pin industrial DC power socket
LED Indicators	Power, signal, network and data status LEDs
Operating temperature	-40° C to 75° C
Dimensions	60 mm x 70 mm x 18 mm
Weight	134 g
